

Property Restoration Program Sponsor Registration

The AV Dust Control Group would like to thank you for sponsoring our newly established Property Restoration Program. The purpose of the program is to improve the environment and quality of life for those affected by sand storms through (a) restoration of properties that have been affected and (b) protection of properties that continue to be threatened by blowing sand.

There are a variety of ways in which you can serve as a sponsor. You can provide a cash donation, products or services, or reduced rates on your products or services. Depending on your level of support, you will be listed in a tiered category of generosity that will be made known to the community, as described below. Any level of support will reflect your interest in the community as we deal with difficulties in repairing damage from recent sand and dust storms. We look forward to celebrating the program's success and sharing stories of community involvement and property restoration.

We are hopeful that you will consider a total contribution to our community that places you in one of our standard recognition levels and provides you the benefits listed below.

Platinum
